1 Research Stuff

1.1 Computer

1.1.1 Get Cadence Incisive on my lab computer

My ticket message with tech support

I have been remoting into the spice machines to use the Cadence Incisive simulator but I was wondering if I could get it on my computer. Thanks Taylor Simons

The reply

Believe me; you don't want it on your computer. The installation is large, and very complex. After a lengthy install process, it's entirely possible you would end up with a different configuration than is available on the lab computers.

1.2 Agenda

1.2.1 **DONE** Set up for scouts

1.2.2 **TODO** Watch Xilinx Computer vision seminar recording
